EMBROIDERY

SCREEN  
PRINTING

## EMBROIDERY

The most common way of applying a logo to garments involving stitching the fabric to produce a word/basic image. Most garments (except our water proof range) can be embroidered providing a professional look every time. Embroidery offers a cost effective solution to suit any budget.

## SCREEN PRINT

We offer traditional screen printing using the latest equipment. Screen printing produces great image quality and Pantone colour reproduction. Effective for large areas/quantities where embroidery does not prove cost effective.

## DIGITAL TRANSFERS

Digital transfers are the best branding solution producing sharp edged logos without fading or cracking. Perfect for logo's requiring high resolution and photo-realistic graphics. Best suited for small quantities or detailed multi-coloured logos/images.

\*Due to the varied nature of logo methods and requirements, all embellishments are quoted based on your specific needs. Please note, there is a 5 item minimum (can be split across styles) for embroidery and screen printing.

\*\*In order to speed up the quoting process and keep costs to a minimum, please supply logo's in the following formats: .ai, .pdf, or .eps files including Pantone Colours.
